Shanette's PVC coated, insulated, steel buildings are the businesses, which need to create additional insulated st

Introduction

The Shanette range of insulated buildings is the ideal choice for supermarket and shop owners, who need to create additional storage space at their premises for the storage of perishable goods and for businesses wishing to construct new office accommodation. The longest established manufacturer of section-built PVC coated insulated storage buildings in Ireland, Shanette Sheds has offered a tough and durable product since its foundation in 1983.

Each of the Company's structures is designed to specific customer specifications, resulting in a bespoke and tailored building, that meets the exact needs of each client.

At our 15,000 sq. ft. manufacturing plant in Kilbeggan, Co. Westmeath, we customise each unit in terms of size, insulation levels, finish colours, windows, doors and roof types to suits our clients' individual requirements.

Shanette manufactures unique products with distinctive style. Installation is a simple operation. With the minimum inconvenience to you, our professional team will have your building erected within hours of arrival on your site.

Standard BS EN 10147:1992.

The substrate is fe E 320 with hot dipped galvanised coating of 275 grammes per square metre. The substrate is primed and 200 microns of leather-grain embossed plastisol are applied to the external surface. The internal surface is galvanised and coated with a standard alkali grey wash coat.

Framework

The buildings' frames consist of galvanised folded sections. All material is structural grade galvanised steel.

Sheeting

Shanette uses a square profile and tile effect pvc coated cladding - Proclad® sheeting, which is a premium quality product manufactured from galvanised coil to European

Insulation

Shanette constructs buildings with two building insulation options.

Standard Buildings

Our standard building option comprises a single skin cladding on the side walls and a 25mm thick, high density, Polystyrene, insulated roof. This roof insulation is lined on both sides with a special breathable membrane. *Shanette is the only steel building manufacturer, that uses this 25mm roof insulation, which prevents condensation, on all of its standard buildings.*

Note: Competing companies use non-drip sheeting on their roofs, which just controls condensation and absorbs water. The underside of the roof still remains wet and therefore cannot be classed as an insulation.

Fully-insulated Buildings

In the construction of our fully-insulated buildings, we use very high quality insulated panels manufactured in Ireland by Kingspan. These panels are available in a choice of thicknesses (40mm, 60mm and 80mm), are insurer approved and manufactured using fire-safe PIR insulation. These composite panels have a PVC coated outer sheet for long-lasting climate protection, while the building interior side of the panel is white in colour with a smooth, easy-clean metal surface. These easily-heated units have the advantage of retaining heat.

ideal choice for supermarket owners, retailers and other storage space or office accommodation at their premises.

Sizes

Shanette's range of insulated buildings are available in a wide variety of sizes:

Standard Lengths:

20ft., 30ft., 40ft., 50ft.

GUARANTEE

Shanette buildings come with a
10 year guarantee.

Brick, Stone & Wood Effect

Exterior Finish Options

Shanette offers its clients a range of exterior finish options. Colours available include Goose Wing Grey, Mushroom, Merlin Grey, Olive Green and Brown.

Since its establishment in 1983, Shanette has had many years of building success. To facilitate clients, who would wish that the exterior finish of their new Shanette building would match with that of their existing premises, Shanette offers a range of brick, stone and wood effect exterior finishes.

Its new, patented stone, brick and wood effect finishes for its buildings are completely maintenance free and extremely attractive.

The new fine pebble dash appearance matches in perfectly with existing buildings. Its striking masonry appearance makes it fit into all environments. Many people value the masonry look for its attractive natural appearance. Horizontally laid, in a variety of colours, its 30 years guarantee makes it a long lasting investment choice.

Shanette's stone effect buildings are the right choice for the Irish climate. Your unit will be installed quickly and cleanly without the usual hassles of getting a masonry building constructed.
